

We are open for in-office patient appointments!

At Advanced Dental Sleep Treatment Center, we are committed to keeping our team and our patients healthy and safe. Following is our protocol for in-office appointments.

Masks are required. There may be times during your appointment where we ask you to temporarily remove it. However, we ask that everyone wear one when entering the office and at all other times unless requested by our team to remove it. If you decline to wear a mask, we will ask you to reschedule. If you need a mask, we will provide one to you.

Upon arrival into the office, you will need to answer 'No' to the following:

- Has Flu/cold-like symptoms
- Anyone in the Household has been in contact with someone with COVID-19 or with someone who is awaiting COVID-19 test results
- Has a decreased sense of taste or smell

Your temperature will be taken upon arrival and if it is at or above 99 degrees, we will be unable to see you that day. We will bring you into a clinical room as soon as we can, but if you do need to utilize the waiting room, we ask that you sit 6 ft away from others; there will be spots designated for safe spacing. All surfaces are disinfected thoroughly between patients. We also ask that you either come yourself, or limit to one other person who accompanies you. If someone does accompany you, they will follow the same in-office guidelines.

Our cleaning and sanitizing protocols have always been very stringent, but please know that we are sanitizing even more than usual and wearing more protective gear than usual, all in an effort to minimize everyone's risk of contracting COVID-19.

Again, thank you for your patience and trust in us during these challenging times. Your safety and our staff's safety are our top priorities. We will update this document as needed.
